

LOVE GOES TO HELL - TECHNICAL SHEET

Stage

Minimum stage dimensions: 8 m length, 8 m depth (it is possible to use smaller stages by contacting the company in advance or non-conventional spaces).

The stage must be clear of any obstructions upon the company's arrival.

Storage space for equipment and various materials is available.

For indoor theaters: black setup: black backdrop, 8 black legs (4 on each side), 4 black ceilings, already installed upon the company's arrival (according to the specifications provided by the company; otherwise, please specify differently).

Sound and lighting control should be positioned at the front, preferably at the back of the room or in another location from which the entire stage can be viewed.

Technical Requirements:

- Audio and lighting system to be provided by the organizing entity.
- Lighting according to the plan provided by the company.
- Audio as per the specifications provided by the company.
- White projection screen with dimensions suitable for the stage space.

Electrical Requirements:

Minimum 20 kW.

Technical Staff to be provided by the organizing entity

- 1 stage manager, audio-light service.

Dressing Rooms:

Sufficient to accommodate 3 people, with showers, mirrors, makeup tables, and natural mineral water.

Other Needs:

The organization must provide any necessary circulation and/or parking permits.

Please report any difficulties or obstructions for loading/unloading materials. Also, please communicate any problems or other matters to the company in advance.

Arrival time to be communicated.

Contact Information:

Company manager: Claudio Ronda, cell. 3298369237

Technical manager: Gianluca Quaglio, cell. 3393367035

Any changes will be communicated to the organization in a timely manner.
